

VIROBOX KITCHEN UVC Virucidal Disinfection

PRODUCT PRESENTATION

- Designed for commercial and industrial kitchen with a 30 minute virucidal sterilisation cycle. IPX4 Certified.
- Sanitises and sterilises all relevant kitchen accessories such as knives etc. and has a safety switch to ensure total user safety.
- Customisable support rack and/or laser cut branded logos at modest minimum order volumes.
- Unit guaranteed for 2 years (except Virokil lamps), and worldwide certified (except North America).

PRODUCT FUNCTIONALITY

- Virucidal Sterilisation Cycle: 30 minute factory setting. Ensure that objects are not placed on top of one another to ensure thorough sterilisation.
 - Internal reflective surface for maximum distribution of UVC light.
 - Internal shelf positioned at an optimum distance from lamps to ensure optimal results.
 - Indicator light that shines red during operation and green when the sterilisation cycle is complete.
 - Total User Safety ensured by a safety switch that cuts all power when the door opens.
 - Auto-start mechanism activates sterilisation cycle once the door is closed.
 - 2 welcome baskets with specific utensils optimised to maximise virucidal effectiveness.
 - Interior Shelf to best position the baskets and facilitate their insertion/extraction.
- *End user to check the long-term service life of the material being sterilised.
