

STAR TRAP UVA LED FLY KILLER

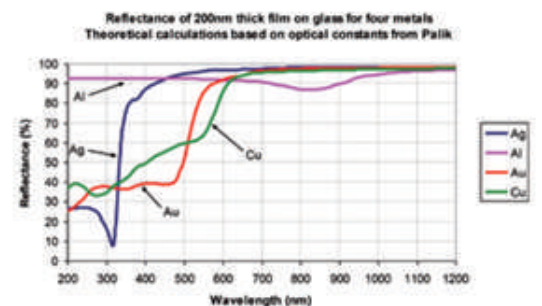

PRODUCT PRESENTATION

- The ultimate in design, efficiency and sustainability.
- Our stylish, discreet first mount UVA LED unit offers maximum efficacy for use in public areas in line with HACCP regulations without compromising on style.
- This unique LED insect light trap is available in white coated or black coated high quality stainless steel.
- The STARTRAP® consumes 75% less energy (5W), and is more than 50% more effective than a UVA compact fluorescent bulb over a 3 year period.

PRODUCT FUNCTIONALITY

- Fitted with the Syltrap Helios® LED lamp under a worldwide worldwide exclusivity agreement between Sylvania and BRC France.
- Aluminium mirror reflects 92% of the UVA rays for maximum efficiency plus 2 large glueboards to ensure maximum capture.
- The glueboards are entirely invisible, 820cm² scope for capture.
